Full Spectrum of these Technologies for Your Organization

We offer agile software development to help organizations own a system designed specifically to address their needs.

CUSTOM BUILT DESIGNS

Is your ready-made software really meeting your needs? Off-the-shelf applications may not always have the right features and functions you want. This is why we offer solutions that are meticulously tailor-fitted with personalized-theme designs to address your specific needs.

SYSTEMS AUTOMATION & INTEGRATION

Did you know it is possible to make workflow easier and more efficient? Let us help you automate your system and integrate applications from different machines into a single tool to increase your operation's processing power.

MEDICAL MACHINE DATA CONSOLIDATION

How can different medical equipments help your organization be adaptable? Enabling connectivity between your medical machines despite having different Operating Systems(OS) can help you consolidate all necessary data and capture all essential activities; ability to accurately identify values, counter check results and achieve flawless reports with just a few clicks.

MAINTENANCE & SUPPORT

Are you getting the right amount of support? Be at ease, we can take care of anything from fine tuning to a technological business transformation whether it be an up-keeping of our own products or supporting a 3rd-party provider of your business.

INFORMATION TECHNOLOGY CONSULTANCY

Helping organizations understand how technology matters in their business and in the future. We help you create a logical path to properly manage business activities, identify areas of revenue and improvements.

LaQuest
Task Simplified.

Our Smart City Initiatives

GOVERNMENT
Our role in the government is focused more on providing IT professional development training and IT Staff augmentation. This is to support the alignment of skills on modern software technologies between the corporate sector and the government sector.

PEOPLE
We build a digital ecosystem for the people to have an easy and efficient access to city services and public information. We have built the Barangay Management Information System (BrMIS) as the main source of information of a resident. The BrMIS also keeps a record of incident reports.

PEACE & ORDERLINESS
We design system integration plans to unify real-time surveillance and access to historical incidental records that will enable authorities to coordinate and respond efficiently on emergencies, anytime.

HEALTHCARE
Helping health professionals streamline their access and workflow process from the different organizations that they are engaged with through information technology. This will assist them achieve efficiency while multi-tasking and gain better insights on reviewing health records and provide the best possible healthcare.

EDUCATION
Part of the school's modernization that we promote is integrating online classes in parallel with the actual classroom learning environment by providing free Google for education to qualified schools and universities.

COMMERCE
We envision to empower exchange of goods on a global scale by creating a digital system for exports and imports that will bridge our network of businessmen across the world. This will enable easy access to the sources of quality products from the different parts of the world.

Our Products

Our response to simplified tasks are exponentially processed behind our solutions.

LAQUEST LABORATORY INFORMATION MANAGEMENT SYSTEM (LIMS)

A comprehensive user-friendly software designed to automate workflow processes and achieve seamless integration of medical machines in optimizing laboratory management for hospital labs & other diagnostic labs.

PATIENT MANAGEMENT SYSTEM (PMS)

An approach to organizing physician's consultation schedules and monitoring patient follow ups with a systematic data flow for easy assessment and administration of patient care. Manage patients from different clinics with single tool.

E-HEALTH AND MEDICAL RECORDS

Specially designed to support medical practitioners in coordinating treatments efficiently through automated documentation, storage and retrieval features with graphs and notification features to easily identify critical cases.

INVENTORY AND ORDERING SYSTEMS

Your handy healthcare monitoring system that enables management and auditing of stocks; shows a quick view of your sales and costing reports as well as inventory of consumables to help you organize your daily management of supplies.

BARANGAY MANAGEMENT INFORMATION SYSTEM (BrMIS)

Get quick access to your constituents' information including an up-to-date report of your barangay's demographics, latest events, blotter reports and a speedy access to public documents.

CLINIC INFORMATION MANAGEMENT SYSTEM

Clinic Management Information System provides a workflow process to augment the need for secure access to complete clinical information of patients.
